Re: NexGen Global Technologies, LLC

Dear Ms. Dortch:

On October 20, 2016, Michael Romano, CEO of NexGen Global Technologies (NexGen) sent to Tim May and David Siehl of the FCC (Federal Communications Committee) the attached email communication along with the five attached articles (also referenced in the same email) that not only addresses the general public's expectation of being able to send photos and videos directly to 911. But also examples of positive lifesaving outcomes due to photos being delivered to 911 communication centers.

The communication and attached articles are related to the efforts of NexGen to have both the wireless carriers and TCC's (Text Control Centers) deliver MMS to certified Text-to-911 solution providers, for further delivery to their PSAP clients.

NexGen's current OTT (Over the Top) Two-Way Text, Plus Media solution, currently installed and in use by Puerto Rico 911, the Florida School for Deaf and Blind and Union County, NC 911 have been deemed an extremely valuable public safety tool by its end users. Validated by Department of Justice National Safety Award won by the Florida School for the Deaf and Blind for its installation and use of this technology.

Please do not hesitate to contact me if you have any questions.

Thank you
Best regards,

A handwritten signature in black ink, appearing to read "Michael Romano".

Michael Romano
